

مجلس دبي للصناعات البحرية و الملاحية
The Dubai Council for Marine and Maritime Industries

CHAIRMAN MESSAGE

مجلس دبي للصناعات البحرية واللاعبة
The Dubai Council for Marine and Maritime Industries

Khamis Jume Buamim
Chairman - DCMMI

The development of marine and maritime industries has become a priority among the pioneers within the marine industry, which makes excellent contributions to the national economy and is an area of international importance.

The marine and offshore industries in the United Arab Emirates has been well-managed during the past three years, because of which, despite the adverse financial conditions and slowdown of global economies, the marine industry has emerged strongly on the back of infrastructure development and value addition to attract the largest offshore projects in the world, especially in oil, gas and marine energy.

At this point in time, many national institutions and companies in the United Arab Emirates play an active role both regionally or internationally in the repair and support of marine operations. In order to supplement international data, we should take the initiative towards the formation of a coalition of national marine and maritime industries.

The Council would represent the steady growth of the marine and maritime industries, attract investments and stimulate legal and legislative frameworks that are most appropriate for the desired development of the most important sectors within the marine and maritime industrial fields.

ABOUT DCMMI

مجلس دبي للصناعات البحرية واللاحيية
The Dubai Council for Marine and Maritime Industries

- The Dubai Council for Marine and Maritime Industries (DCMMI) is a specialized industry council (non-profit trade and industry council) formed in 2013 to promote the interests of the marine and maritime industry in Dubai and the UAE. DCMMI represents a wide cross-section of the UAE's marine and maritime industry such as Offshore & Engineering, Ship Repair & Maintenance, Shipbuilding & Conversion Rig Building, Chandlery and Yacht Services.
- These sectors are represented by operators, ship owners, charterers, marine legal service providers, ship managers, brokers, P&I clubs, port operators, marine insurance companies, ship chandlers and yacht manufacture, maintenance and management companies. As well as most of the established local and international manufacturers and suppliers of marine and offshore components, it also represents marine and offshore engineering contractors and companies whose activities are directly related to the industry including classification societies and marine consultants.

DCMMI – VISION, MISSION & CORE VALUES

مجلس دبي للصناعات البحرية و الملاحة
The Dubai Council for Marine and Maritime Industries

The Dubai Council for Marine and Maritime Industries is set up with the aim to plan and implement economic strategies that promote Dubai and the United Arab Emirates as a global hub for marine and maritime industries and services and sea transportation which focus on excellence, investment and talent building.

"We create for our industry a climate which supports sustainable economic growth with vibrant business and creative opportunities"

DCMMI – ABOUT THE INDUSTRY IT REPRESENTS

مجلس دبي للصناعات البحرية واللاعبة
The Dubai Council for Marine and Maritime Industries

- The Dubai and the UAE marine and maritime industry is a world-class industry with an international clientele. Dubai is one of the world's premier ship repair and shipbuilding centers and a world leader in the offshore engineering and conversion of Floating Production Storage and Offloading (FPSO) and Floating Storage and Offloading (FSO) units. It is a niche player for the building of customized and specialized vessels and structures covering a wide spectrum of advanced marine technology.
- Dubai is becoming a global leader in the building, repair and overhaul of jack-up rigs and a major builder of semi-submersible drilling rigs and vessels. Its' rig-builders are capable of building, repairing, upgrading and converting rigs and other offshore platforms for operations in deep water and harsh environments.
